<b>Office Action Summary</b>	<b>Application No.</b> 10/685,303	<b>Applicant(s)</b> STUART, GRAHAM M.	
	<b>Examiner</b> Ramesh Krishnamurthy	<b>Art Unit</b> 3753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This office action is responsive to communications filed 02/27/2006.

**Claims 5 - 8 are pending.**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Thiltgen (US 5,036,875).

Thiltgen discloses a valve mechanism (Figs. 1– 8) including a moveable closure member (74), spring means (80) resiliently biasing the moveable member towards a first position i.e. closed position and linkage means (See Figs. 2 - 4) retaining the moveable member in a second position i.e. open position including a chemically sensitive member (90) which is arranged to release in the presence of a contaminant. The chemically sensitive means comprises an elongate member having at least one end near (98) whose surface is frictionally engaged by an end cap of a cooperating member (96) of the mechanism and is adapted to be chemically degraded by the contaminant so that the frictional engagement is lost.

3. Claims 5 and 6 are allowed.

***Response to Arguments***

4. Applicant's arguments filed 02/27/2006 have been fully considered but they are not persuasive. Applicant's argument that the two parts (90,96) merely abut each other and are not held by frictional engagement is unpersuasive. If there was no frictional

Art Unit: 3753

engagement between the elements (90) and (96) the moveable closure member (74) would not be actuated to close at all, since the chemically sensitive member (90) would merely deteriorate with out any corresponding effect on the end cap of the abutting member (96).

**5. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
